

More Data – Less Emissions

Lars Atle Andersen
VP Technology and
Digitalization
Aker BP

Aker BP's contribution to the energy transition

PRODUCE : Producing barrels efficiently and creating greater value to society

EMISSIONS : Reducing emissions from our operations

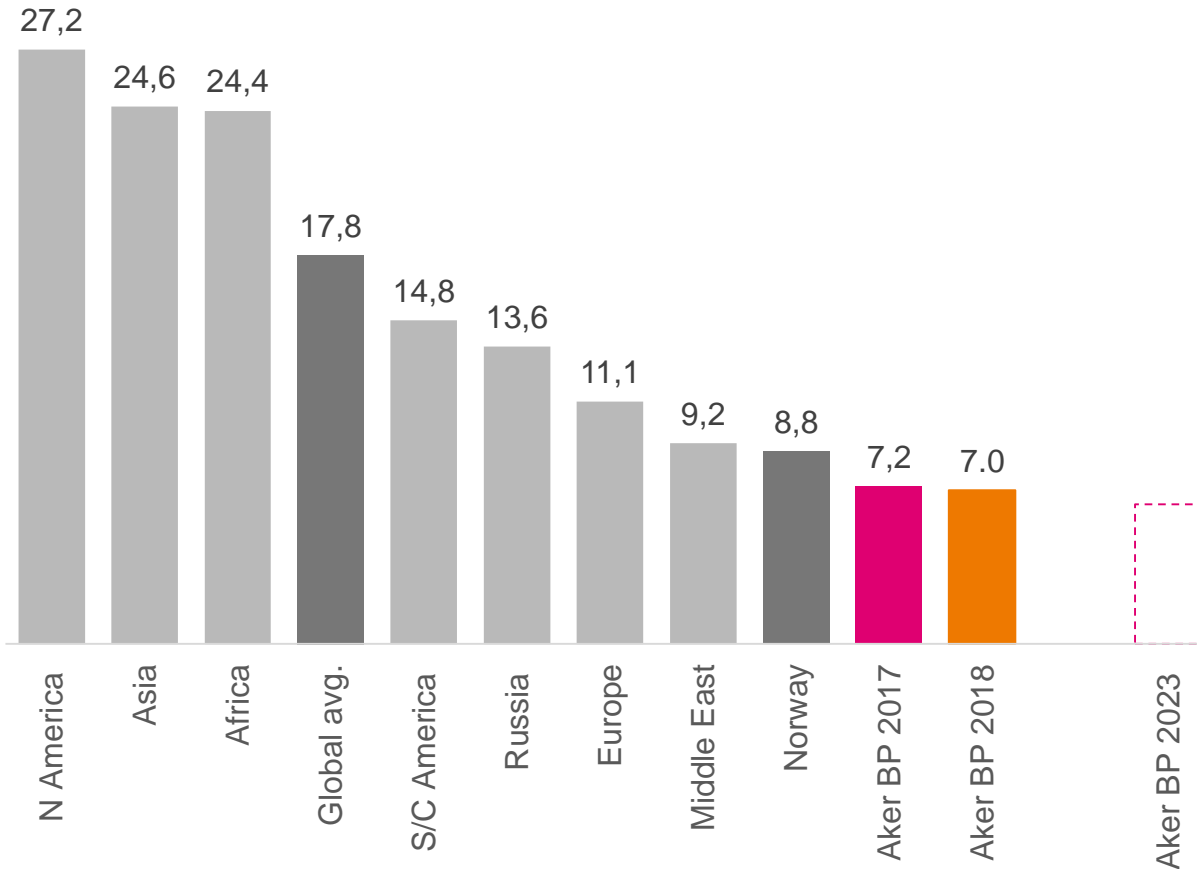

SHARING : Contributing with know-how, data, and experience promoting growth beyond our own operations

Industry leading low carbon intensity

CO₂ emissions intensity¹⁾

kg CO₂ per boe produced (2017)

- Low carbon intensity with 3 of 6 assets fully **electrified**
 - Valhall, Johan Sverdrup (partner) and Ivar Aasen (from 2022)

- Founding partner of **Centre for the Fourth Industrial Revolution Norway**
 - World Economic Forum's global C4IR network will develop solutions for a sustainable and profitable ocean economy

- Digitalization and **energy efficiency** integral part of Aker BP's improvement program
 - 17 000 tonnes of annual CO₂ emissions reductions at Skarv

Energy optimization – Skarv

More data, less emissions!

**More data
Better decisions
Less emissions!**
