

Last year's OG21-forum

OG21-forum is OG21's annual conference. OG21 examines every year a selected topic through a deep dive study. At the OG21-forum, OG21 presents results from the study and invites industry stakeholders to present their views on the topic.

The theme for the OG21-forum 2018 was "Dare, choose, win: How technology create value".

The Norwegian Continental Shelf is today competitive thanks to remarkable cost-reducing efforts over the last 4 years. Technology contributes to cutting costs and emissions and is therefore important for maintaining competitiveness into the future. Norwegian suppliers develop a lot of new technology, but the oil companies are too slow at adopting it. This leads to lost value creation for the society and enterprises.

At the OG21-forum 2018, OG21 presented its latest [report on how risks are assessed when technology decisions are taken](#). Thought leaders from the industry, regulators and academia presented their views on the topic.

Close to 270 delegates participated through round-table discussions and dialogue with the invited panel participants.

You will find the presentations here:

[Statssekretær Ingvil Smines Tybring-Gjedde](#)

[Karl Johnny Hersvik, Aker BP](#)

[Ståle Kyllingstad, IKM-gruppen](#)

[Roy Ruså, Petoro](#)

[Anne Grete Ellingsen, GCE Node](#)

[Jarand Rystad, Rystad Energy](#)

[Christina Johanson, OG21](#)

[Liv Hovem, DNV GL](#)

[Reidar Bratvold, UiS](#)

[Kjell E. Jacobsen, EV](#)
